

Platform features

The table below shows the major features and on which software subscription level they are available.

Features	Standard	Auto	Professional
Trading directly from charts (single click)			
Trade on different DOM (Depth of Market) screens. Simple DOM, Scalping DOM, Multi DOM / Quote.			
Real time tick-by-tick Charting for both live trading, simulation and replay.			
Programmable Chart Alerts			
Extensive library of built in technical analysis indicators.			
Fibonacci Extension and Projections tools			
Up to 6 years of tick-by-tick history for most major markets.			
Account Manager for managing multiple accounts with performance statics metrics			
Order Manager to view and manage open orders.			
Time, Tick, Volume, Range, Reversal and Price Change bars.			
Simple order bracketing for the trader who just want to automatically protect the open position.			
Multiple Order Target order management for the intermediate trader that requires more flexibility.			
Advanced Order Strategies that provides an easy interface to build advanced combinations of intelligent orders such as bracket orders, trailing stops, indicator trailing stops, average price and net position tracking.			
Historical tick-by-tick replay for practicing and evaluating trade setups, order strategies and trade strategies.			
Advanced lot size management to get most favorable order positioning in the Exchange order matching queue.			
Automatic Email or SMS notifications of order fill events.			

Market Profile (add-on \$39/month)			
Woodies CCI (add-on \$0/month)			
Strategy Builder / Automation			
Strategy Builder for automating complex trade setups and strategies.			
Tick-by-Tick back testing of Trade Strategies using the actual bid/offer price at the time of the strategy signal.			
Trade Station and eSignal integration for receiving and executing trade signals.			
Software API to receive and execute 3 rd party software signals			
Advanced order flow analytics			
Volume Study Indicators with trade size filtering such as Cumulative delta, Split Volume and Buy/Sell differentials.			
Long term Volume Profiling histogram with trade size filtering.			
Volume Map charts with trade size filtering.			
Institutional Volume Filter to track the bid/ask activity at any point in time with bid/ask pressure indicator and trade size filtering.			
Pullback bar that measures the pull back from the current bar latest high or low.			
Equi volume bars to display relative volume between bars			
Price (excluding any add-ons)	\$59/month	\$109/month	\$159/month

Multiple Order targets

Advanced Order Strategies

An order strategy is a combination of intelligent orders that creates the desired behavior for entering or exiting a trade. Each order can be setup to automatically modify its price or volume depending on external conditions. Pre and Post conditions defines what should happened prior to or after an order completes (either gets filled or cancelled).

Order Strategy

Account Manager

The account manager gives you a summary view of the existing accounts, what markets have been traded on each account as well as the last recorded position. Here is also where you can run fill reports on each account to get performance statistics

The screenshot shows a software window titled "Accounts" with a close button in the top right corner. The window is divided into several sections:

- Account Information:** Includes a dropdown for "Account Name" (SimAccount2), a text field for "Account Data Source" (TradeMaven Sim), and buttons for "Create", "Edit", and "Delete".
- Summary Statistics:** Displays "Today's Gross Profit" (0.00), "Today's Net Profit" (0.00), "Current Account Balance" (0.00), "Commission" (0.00), and "R/Ts" (0). Buttons for "Refresh", "Close", "Add to List", and "Remove from List" are also present.
- Table:** A table with columns: Contract, NetPos, AveragePrice, NetProfit, and CNetProfit. It lists three contracts: ES U11, ES M11, and ES H11, all with a NetPos of 0 and other values of 0.00.
- Account Notes:** A text area for notes, with "Margin" (0.00) and "R/T" (0.00) fields, and an "Enter External Fill" button.
- Analyze Account:** A section titled "Analyze Account (First select Account and Contract)" containing "Start Date" (7/10/2011), "End Date" (7/10/2011), "Report" (Today's Fills), and "Charts" (Price Volume) dropdowns, along with "Run Report" and "View Chart" buttons.

Strategy Builder

Using the principles of state-event machines time sequenced strategies can be built that allows step by step condition evaluation prior to triggering a trade. No programming skills are required since the strategy is created using built in dialogs and menus. This tool is also where integrations to TradeStation, eSignal or 3rd party software are done.
